Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 29 March 2007.
 2a) This action is FINAL. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Applicant's election with traverse of Group I-claims 1-14 in the reply filed on 3/29/2007 is acknowledged. The traversal is on the ground(s) that there is no serious burden to the Examiner. This is not found persuasive because the applicant clearly discloses and claims separate inventions, which would require a separate search. Furthermore, by the applicant's own admission of drafting of the claims and the specification, separate and distinct inventions have been presented.

The requirement is still deemed proper and is therefore made FINAL.

In summary:

Claims 15-22 are hereby withdrawn from consideration; and

Claims 1-14 are herein addressed below.

The applicant's information disclosure statement dated 3/29/2004 has been considered and a copy has been placed in the file.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gillery (4,235,048) in view of Finley (2002/0045073 A1). Gillery ('048) discloses a reversible window unit having reflective layers on an insulated glass mounted within a

Art Unit: 3634

pivoting frame, which is mounted within a framed opening. Gillary ('048) fails to disclose a photocatalytic layer of titanium. Finley (2002/0045073 A1) discloses a photocatalytic layer of metal oxide titanium formed on a glass pane substrate. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the reversible window assembly of Gillary ('048) with a photocatalytic layer of titanium as taught by Finley (2002/0045073 A1) since a self-cleaning layer allows the window assembly to be easily cleaned by itself.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. patent application publications to Yamamoto et al., Azzopardi et al., Snaderson et al., Krisko et al., Tonar et al., and Myli et al. disclose coatings similar to that of the applicant's invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerry Redman whose telephone number is 571-272-6835. The examiner can normally be reached on M-TH from 8 to 6.

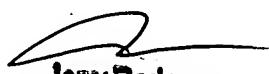

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Cuomo, can be reached on 571-272-6835. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.
